5 1/2 activity is occurring even though investigators said it wasn't; as it is something mutually agreed on; but people involved in project felt a necessity to conduct it despite agreement. Idea of ends justifies means.

Site involves event composed of 5 stages; planning; preparation; conduct; evaluation; during course of conduct of project, ^{object} receiver receives input which is information in nature & diverse, controls, varieties status; & has something w/ parameters + "supervising" + ^{object} "performance envelope." After 1st part, when impetus for object no longer present, information flow reverses; output involves response/reporting. Periodic input during 2nd part reflects attitude, perhaps cause a reorientation. Entire project has sense of "quasi-legality"; as if people at site felt activity would be frowned on by 3rd party if cognizant of it; but it would evoke a feeling of betrayal or unfaithfulness; as if activity is occurring even though investigators said it wouldn't upon mutual agreement. But people involved felt necessity to conduct it nevertheless; "ends justify means."
